PRE-PROFESSIONAL PROGRAMS

Pre-professional programs help students prepare for entrance into professional degree programs. Many professional degree programs are offered only at the post-baccalaureate level, so an undergraduate degree is needed before enrolling in them. UW-Eau Claire offers a variety of academic majors that provide excellent preparation for applying to such professional programs. Students interested in these programs should select an academic major that will prepare them to compete for such programs (many are highly selective) as well as provide career alternatives. For other professional degree programs, students transfer to another higher education institution to complete the appropriate professional degree.

Pre-professional programs are not academic degree programs (that is, they are not academic majors, minors, or certificates). Instead, pre-professional programs provide an organized approach to academic advising for students intending to apply to a professional degree program. To enhance academic planning and preparation while enrolled at UW-Eau Claire, a student interested in obtaining a professional degree should:

- Work with a pre-professional advisor who can help plan an appropriate curriculum in the field of interest.
- Obtain information from other colleges/universities regarding specific academic requirements for the professional degree program of interest.
- Declare an academic major that is logically connected to the professional field, and work with an advisor in the academic major.

Pre-Chiropractic
(Code 704-900)

Advisor: M. Mattes (Kinesiology).

The pre-chiropractic program is intended to prepare students for admission into a chiropractic college. Most accredited chiropractic colleges prefer that students earn a baccalaureate degree before beginning, or concurrently with, their chiropractic training. Because the specific requirements of professional schools vary considerably, students should obtain current academic catalogs from the schools in which they are interested. The pre-chiropractic program is an advising track and not a major, minor, or certificate program. Interested students should select an appropriate major in consultation with an academic advisor in their chosen area of study.

Pre-Dentistry
(Code 705-900)

Advisors: W. Gallagher (Chemistry), J. Halfen (Chemistry), J. Lyman Gingerich (Biology).

Students should plan to spend at least three years in pre-professional work. Many pre-dentistry students complete a B.S. degree in biology or chemistry. A typical first-year program includes:

Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 103</td>
<td></td>
</tr>
<tr>
<td>&amp; CHEM 104</td>
<td></td>
</tr>
<tr>
<td>&amp; General Chemistry I</td>
<td></td>
</tr>
<tr>
<td>OR</td>
<td></td>
</tr>
<tr>
<td>CHEM 115</td>
<td></td>
</tr>
<tr>
<td>&amp; CHEM 213</td>
<td></td>
</tr>
<tr>
<td>&amp; Chemical Principles</td>
<td></td>
</tr>
<tr>
<td>&amp; Quantitative Analysis</td>
<td></td>
</tr>
</tbody>
</table>

Required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 221</td>
<td>4</td>
</tr>
<tr>
<td>MATH 109</td>
<td>4</td>
</tr>
<tr>
<td>MATH 114</td>
<td>4</td>
</tr>
<tr>
<td>MATH 215</td>
<td>4</td>
</tr>
<tr>
<td>MATH 216</td>
<td>4</td>
</tr>
<tr>
<td>PHYS 231</td>
<td>5</td>
</tr>
<tr>
<td>PHYS 232</td>
<td>5</td>
</tr>
</tbody>
</table>

Note: High school preparation should include as much algebra, trigonometry, and advanced mathematics as possible as well as courses in chemistry and physics.

Students should plan to transfer after two years at UW-Eau Claire unless they decide to pursue the Dual Degree Engineering Emphasis in Physics or the Dual Degree Geological Engineering Emphasis in Geology. Required freshman and sophomore courses include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 114</td>
<td>Calculus I</td>
</tr>
<tr>
<td>MATH 215</td>
<td>Calculus II</td>
</tr>
<tr>
<td>MATH 216</td>
<td>Calculus III</td>
</tr>
<tr>
<td>PHYS 231</td>
<td>University Physics I</td>
</tr>
<tr>
<td>PHYS 232</td>
<td>University Physics II</td>
</tr>
</tbody>
</table>

Many fields of engineering also require chemistry, statics, dynamics, differential equations, and computer programming. Students should be aware that many engineering schools require GPAs of 2.50 or higher to be admitted to the junior year. Consult a pre-engineering advisor, because specific course and grade requirements vary among engineering fields as well as among schools of engineering.

Pre-Law
(Code 425-900)

Advisors: M. Gilkison (Political Science), E. Kasper (Political Science), M. Meyer (Philosophy and Religious Studies), P. Myers (Political Science).
Students should plan to complete a baccalaureate degree before applying for law school admission and may choose from any major program of study. Choice of major and minor fields should be done with the following information in mind, including consideration of an alternative career plan. In addition to meeting with their major advisor, students should meet with one of the Pre-law advisers early in their first semester. The American Bar Association recommends that future lawyers select a major that develops skills in reading and interpreting texts, research and writing. The skills most valued in law school are analytic and problem-solving skills and courses that challenge the student in these areas are recommended. Law school admissions are based on successful completion of the undergraduate degree and scores on the Law School Admission Test (LSAT), along with other criteria set by particular programs. Studies show that students in the following majors consistently score highly on the LSAT: Economics, Finance, History, Literature, Philosophy, Physics/Math, Political Science, and Religious Studies. Courses which are recommended, regardless of major, are:

- ACCT 201 Principles of Accounting I
- ANTH 422 Anthropology of Law
- BSAD 305 Legal and Regulatory Environment
- or BSAD 306 Business Law
- CJ 414 Mass Media Law
- ECON 103 Principles of Microeconomics
- ECON 104 Principles of Macroeconomics
- ENGL 201 Advanced College Writing
- MATH 111 A Short Course in Calculus (and/or MATH 246)
- PHIL 150 Logic and Critical Thinking
- PHIL 310 Philosophy of Law
- POLS 110 American National Politics
- And other courses dealing with the American political system

In addition, U.S. and world history courses, as well as ethics are recommended. Students may want to consider majoring in the Legal Studies emphasis in the Political Science Comprehensive Major or creating a topical minor in pre-law. To obtain Pre-Law designation, contact the Political Science department chair. This designation is in addition to major, minor, and certificate program designations.

NOTE 1: The LSAT should be taken early in the senior year (usually September or October).

NOTE 2: Entry into medical schools is based on the following:
1. the student’s academic record,
2. the results of the Medical College Admission Test, which should be taken in the spring of the junior year,
3. recommendations, and
4. interviews.

NOTE 3: A limited number of scholarships are available for sophomore, junior, and senior pre-medicine students who meet the scholarship criteria.

**Pre-Occupational Therapy**
(Code 665-900)

Advisor: M. Mattes (Kinesiology).

The pre-occupational therapy program is intended to prepare students for admission into a graduate program in occupational therapy. Most occupational therapy programs are now at the graduate level. Students should plan on completing a baccalaureate degree before applying to occupational therapy graduate programs. Because the specific requirements of professional schools vary considerably, students should obtain current academic catalogs from the schools in which they are interested. The pre-occupational therapy program is an advising track and not a major, minor, or certificate program. Interested students should select an appropriate major in consultation with an academic advisor in their chosen area of study.

**Pre-Medicine**
(Code 706-900)

Advisors: J. Anderson (Biology), W. Bryant (Biology), W. Gallagher (Chemistry), D. Gingerich (Biology), J. Halfen (Chemistry), D. Janik (Biology), M. Kettler (Biology), J. Rohrer (Biology).

The pre-med curriculum consists of those courses needed to meet the entrance requirements for the majority of medical schools and to prepare students to take the Medical College Admission Test. The majority of students should plan to complete the requirements for a baccalaureate degree. Because of the competition for available places, students are urged to plan programs that will permit alternative career choices if acceptance into medical school is not secured. Typical first-year courses include:

- BIOL 221 Foundations of Biology I
- CHEM 115 Chemical Principles & CHEM 213 and Quantitative Analysis
- CHEM 103 General Chemistry I & CHEM 104 and General Chemistry II

**Pre-Optometry**
(Code 703-900)

Advisor: D. Janik (Biology).

Students should plan to spend at least two years in undergraduate study; the majority of successful applicants have three or four years of college work. A typical first-year program includes:

- BIOL 221 Foundations of Biology I
- CHEM 103 General Chemistry I & CHEM 104 and General Chemistry II

Consult an advisor for further recommendations.
Consult an advisor for further recommendations.

NOTE: The Optometry Admission Test should be taken before the semester in which the student applies for acceptance into a school of optometry. Because of competition for the available places, students are urged to plan programs that will permit alternative career choices if acceptance into an optometry school is not secured.

Pre-Physician Assistant
(Code 707-900)

Advisors: D. Herman (Biology), D. Janik (Biology).

Most physician assistant programs are now at the graduate level (M.S.). Students should plan on completing a baccalaureate degree before applying to physician assistant graduate programs. Specific requirements for admission will vary among programs, and students are encouraged to consult the specific program catalog for these requirements. In preparation, students should take two semesters of chemistry, two semesters of physics, precalculus/calculus, biology courses including organismal form and function, microbiology, two semesters of anatomy and physiology, psychology courses, and a communication course. Other courses may be required. Consult with an advisor for further recommendations and information, including information about regional program requirements.

Pre-Veterinary Medicine
(Code 708-900)

Advisor: S. Showsh (Biology).

Students should plan to spend at least three years in pre-professional work. Many students complete a B.S. degree. A typical first-year program includes:

- BIOL 221 Foundations of Biology I
- BIOL 214 Human Anatomy and Physiology I
- & BIOL 314 and Human Anatomy and Physiology II

Select one or more of the following:

- ECON 103 Principles of Microeconomics
- SOC 101 Introduction to Sociology
- ANTH/AIS Introduction to Cultural Anthropology

Required:

Completion of the University Writing Requirement

Consult an advisor for further recommendations.

NOTE: Most schools of veterinary medicine require experience with animals, such as that gained through a farm background or working as assistant to a veterinarian, as well as the completion of the general test of the Graduate Record Examination. Because of competition for the available places, students are urged to plan a degree program that will permit alternative career choices if acceptance into a school of veterinary medicine is not secured.

Pre-Physical Therapy
(Code 662-900)

Advisor: M. Mattes (Kinesiology).
