Graduate Faculty
Michael I. Axelrod, Ph.D. (Director)
Melissa Coolong-Chaffin, Ph.D.
Cheryl A. Lapp, Ph.D.
Vicki M. Samuelson, Ph.D.
Mary Beth Tusing, Ph.D.

The Human Development Center (HDC) is a nationally known interdisciplinary program working with individuals and families from western Wisconsin. Under the direct supervision of faculty supervisors, graduate student clinicians from multiple disciplines (e.g., Communication Sciences and Disorders, Nursing, School Psychology, Social Work) provide assessment, intervention, and consultation services to children, adolescents, young adults, and families. The HDC offers faculty and students the opportunity to collaborate with other disciplines in clinical practice and research. Cooperative and individual research projects are encouraged. Major research projects are conducted by faculty members with assistance from graduate assistants employed at the HDC, or by graduate students working with faculty on theses or other research projects.

Students participate in the HDC as part of assessment, practicum, or internship courses that are offered within the various participating departments. An average of 70 graduate students participate directly in interdisciplinary assessment, intervention, and consultation activities each year.

Research Support
Some funding is available to assist graduate students in their research costs and research dissemination through the Office of Research and Sponsored Programs.

Use of Human Subjects in Research
Federal regulations and University policy require that research projects involving human subjects be designed to protect the rights of the subjects, the researcher, and the University. This pertains to all classes, independent studies, and thesis research as well as faculty/student research collaborations. Each proposal involving human subjects and its provisions for their protection must be reviewed and approved by the Institutional Review Board (IRB) for the Protection of Human Subjects prior to initiation of the work. Some low-risk studies at the undergraduate level may be covered by an instructor who is certified to provide training on the basics of human protection to a given course. However, at the graduate level, research projects involving human subjects need IRB committee approval, an on-line process which starts with a tutorial on human subjects protection.

Research on regular and special education instructional strategies and research on the effectiveness of or comparison of instructional techniques, curricula, or classroom management methods are among the types of projects that may be handled by an expedited review process. For more information on the IRB process, see the manual Policies and Procedures for Protection of Human Subjects in Research, available electronically at www.uwec.edu/ORSP/IRB.
