Department Website (https://www.uwec.edu/academics/college-arts-sciences/departments-programs/computer-science)

About Us
Computer Science and Software Engineering are disciplines that combine concepts from mathematics, science, and engineering into a coherent and disciplined study of the software and hardware required for computation. The programs offered by the UW-Eau Claire Department of Computer Science provide the fundamental education necessary to prepare students for positions in industry or to pursue graduate study. The curriculum is organized so that graduates will be able to meet immediate demands for solving computational problems or designing state-of-the-art computer systems, yet also have an understanding of the basic principles and concepts in computer science needed to avoid technological obsolescence in a rapidly changing environment. This program is intended to produce computer science professionals, not merely technicians with some training in computer software and hardware. Success requires a strong aptitude in mathematics.

The Program for Majors and Minors
Department faculty constantly examine the curriculum to ensure that students gain both the breadth and depth of knowledge needed to be successful in careers in business and industry, or in graduate school. The major/minor curriculum includes:

1. Introductory courses which cover the basic principles of Computer Science.
2. The use of object-oriented and other programming paradigms.
3. An integrated blend of courses which cover the tools, knowledge, problem-solving, and programming techniques that form the basis for a successful career.
4. A capstone experience.

Departmental Honors in Computer Science
Eligibility: Students with resident and total GPAs of 3.50 or higher and a 3.50 or higher in at least 12 credits of computer science.

Procedure: A written application for Departmental Honors in Computer Science shall be approved by the research advisor and the departmental honors committee. The application and approval process must be completed no later than the end of the junior year.

Requirements:

1. The satisfactory completion of
   a. six credits of registration in Computer Science Research, including the writing of a research paper;
   b. an oral presentation to be given to at least three members of the faculty.
2. Resident and total GPAs of 3.50 or higher in both the computer science major and for all credits attempted to meet graduation requirements.
3. Participation in at least one Student ACM Programming Contest.

Information for All Students
It is strongly recommended that the student have a grade of C or above in any Computer Science course, which is to be used as a prerequisite to another course. Where a grade of C- or below is earned in a Computer Science course, the student should repeat the course before continuing.

Satisfactory/Unsatisfactory Policy
The Satisfactory/Unsatisfactory option may not be elected to satisfy a course requirement at the 200 level or higher for the major or minor programs, except for CS 490.

Faculty
Jack Tan, Chair
Heather Amthauer
Christopher Johnson
Heidi Tessmer

Majors
- Major: Computer Science, Software Engineering, Liberal Arts - B.A./B.S.
- Comprehensive Major: Computer Science, Liberal Arts - B.A./B.S.

Minors
- Minor: Computer Science, Liberal Arts Emphasis

Certificates
- Certificate: Computer Programmer

CS 100 Computer Information Technologies (3 crs)
No credit toward computer science major or minor. Not applicable for satisfying B.S. GE-IB requirement in College of Arts and Sciences.

Development and application of appropriate processes and tools to access, organize, evaluate, and communicate information using spreadsheets (MS Excel), word processors (MS Word), databases (MS Access), presentation software (MS PowerPoint), and web-based/internet utilities. Appropriate for students seeking a broader or deeper preparation for efficiently using computer information technologies.

Attributes: GE IB Communication-Analytical Skills
Lecture/Discussion Hours: 2.5
Lab/Studio Hours: 1

CS 145 Programming for New Programmers (4 crs)
Prerequisite: MATH 109 or concurrent, or placement into MATH 111, 112, 113, 114 or 215. Computer science majors must take concurrently with CS 146. Cannot earn credit in both CS 145 and CS 148
- Students with prior programming experience should take CS 148 instead of CS 145.

A general introduction to programming, introducing data types, procedural abstraction, flow control, and object-oriented design.

Lecture/Discussion Hours: 3
Lab/Studio Hours: 2
CS 146 The Big Picture in Computer Science (1 cr)
Prerequisite: Limited to computer science majors. Must be taken concurrently with CS 145 or CS 148.

*Must be taken by students during their first semester in the computer science major.*

Explores how a liberal education relates to computer science, the impacts of computers on society, and ethical expectations of the discipline. Provides an overview of computational thinking and technical topics.

Lecture/Discussion Hours: 1
Lab/Studio Hours: 0

CS 148 Programming for Experienced Programmers (4 crs)
Prerequisite: MATH 109 or concurrent, or placement into MATH 111, 112, 113, 114 or 215. Computer science majors must take concurrently with CS 146.

Students with prior programming experience take CS 148 instead of CS 145.

 Cannot earn credit in both CS 145 and CS 148

A project-based study of programming concepts. Topics build upon student’s prior exposure to variables, functions, conditionals, loops, and arrays.

Lecture/Discussion Hours: 3
Lab/Studio Hours: 2

CS 163 Introduction to Programming in C++ (3 crs)

*Three years of high school, college preparatory mathematics. No credit for CS majors if taken after or concurrently with CS 145 or CS.*

A general introduction to the design of computer software. Object-oriented design and implementation techniques including abstraction, encapsulation, and inheritance are emphasized. Applications chosen from mathematics, science, and business are used to demonstrate and motivate understanding of object-oriented programming.

Attributes: GE IB Communication-Analytical Skills
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 170 Computing for the Sciences and Mathematics (3 crs)

Prerequisite: MATH 112, or MATH 113, or placement into MATH 114 or MATH 215.

Aspects of computation that are particularly relevant to scientific computation. Discussion of numeric processing, symbolic processing, datamanagement, data representation, and scientific visualization. Students design and implement computer programs.

Attributes: GE V University Wide
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 245 Advanced Programming and Data Structures (4 crs)
Prerequisite: CS 145 or CS 148. MATH 112 or concurrent enrollment, MATH 113 or concurrent enrollment, or placement into MATH 114 or MATH 215.

Advanced object-oriented programming techniques including OO design, distributed and concurrent computation, GUI development, and testing. Implementation and use of data structures including lists, stacks, queues, trees, and graphs.

Lecture/Discussion Hours: 3
Lab/Studio Hours: 2

CS 252 Computer Systems (4 crs)
Prerequisite: CS 245, MATH 114 or concurrent enrollment.

Introduction to systems level concepts including number system representation, digital logic, machine models, assembly language, UNIX, C programming and memory management, and parallel architectures.

Lecture/Discussion Hours: 3
Lab/Studio Hours: 2

CS 260 Database Systems (4 crs)
A study of fundamental database concepts including: SQL database design and normalization, transactions and concurrency, embedded SQL, and stored procedures.

Lecture/Discussion Hours: 3
Lab/Studio Hours: 2

CS 268 Web Systems (3 crs)
Prerequisite: CS 245. May be taken concurrently with CS 260.

Introduction to programming Web-based applications. Multiple modern Web technologies are covered in depth and compared. Web frameworks, server configurations, and security issues are discussed.

Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 278 Digital System Design (4 crs)
Prerequisite: Either CS 145 or CS 163, or consent of instructor.

*No credit if taken after Special Topics course of the same title.*

Logic components, Boolean algebra and algorithmic logic simplification, combinational logic and synthesis, synchronous and asynchronous sequential logic design and synthesis, finite state machine design, programmable logic and FPGAs, Verilog programming for synthesis.

Lecture/Discussion Hours: 3
Lab/Studio Hours: 2
CS 290 Introduction to Data Management (3 crs)
Prerequisite: Limited to organizational leadership and communication comprehensive major, Bachelor of Professional Studies degree.
An introduction to managing data using technology. Topics include understanding different types of data, managing data using spreadsheets and databases, creating application macros to manipulate data, designing and implementing databases, and visualizing data.
Attributes: GE IB Communication-Analytical Skills, BPS Flat Rate Tuition
Grading Basis: A-F Grades Only
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 291 Special Topics (1-3 crs)
- See current Class Schedule.
An examination of current topical material of special interest to students and faculty.
Repeat: Course may be repeated

CS 318 Fundamentals of Web Page Design (3 crs)
Basic concepts, coding standards, accessibility guidelines, and technologies of client-side Web page design. Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), and techniques for controlling page layout, animations, and user interactions.
Attributes: GE IB Communication-Analytical Skills
Lecture/Discussion Hours: 2
Lab/Studio Hours: 2

CS 319 Introduction to Web Programming (3 crs)
Prerequisite: CS 318. No credit if taken after CS 268.
- No credit toward computer science major requirements.
Introduction to client and server side Web programming. Includes basic programming concepts, user input validation, dynamic Web pages, and data retrieval and display.
Attributes: GE IB Communication-Analytical Skills
Lecture/Discussion Hours: 2
Lab/Studio Hours: 2

CS 320 Web Database Design and Implementation (3 crs)
Prerequisite: CS 318 or concurrent enrollment; CS 319 or concurrent enrollment.
- No credit toward computer science major requirements.
Introduction to databases for Web applications. Architecture, design considerations, and implementation of relational database systems. Web/database application development.
Lecture/Discussion Hours: 2
Lab/Studio Hours: 2

CS 321 Web Design and Development (3 crs)
Prerequisite: CS 320
Analysis, design, and implementation techniques for Web site development. Includes preparation of design documents development, deployment, and testing. Students complete and deploy a comprehensive Web site working with clients and end-users.
Attributes: Service-Learning, Full 30 Hours
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 322 Animation Programming (3 crs)
Introduction to current technical and creative trends in digital animation principles, including real-time, interactive animations, gestural interfaces, and basic motion capture for use in animation and game development.
Lecture/Discussion Hours: 0
Lab/Studio Hours: 3

CS 330 Programming Languages (3 crs)
Prerequisite: CS 252
Study building blocks of modern programming and programming paradigms including functional, imperative, object-oriented, and logical. Emphasis on teaching students how to learn new programming languages. In-depth study of C++ and memory management techniques.
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 335 Algorithms (3 crs)
Prerequisite: CS 245. Concurrent enrollment in MATH 314.
Discussion of algorithm design, problem-solving methods. Specific algorithm topics include divide-and-conquer, dynamic programming, and backtracking.
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 352 Computer Architecture (3 crs)
Prerequisite: CS 252
A study of hardware organization and architecture including performance metrics, machine data and instruction representations, computer arithmetic, assembly language programming, ALU design, CPU design and control, microprogramming, pipelining, cache memory systems, and I/O peripherals.
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 355 Software Engineering I (3 crs)
Prerequisite: CS 260. Credit cannot be earned in both CS 321 and CS 355.
A hands-on experience in software engineering with key aspects of the software development life cycle. Focus is on the application of a high-level development environment to the fulfillment of an object-oriented software design specification. An introduction to modern design patterns.
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

</tbody>
</table>
CS 482 Research in Computer Science I (3 crs)
Prerequisite: CS 355. Limited to computer science majors and minors. Minimum resident and total GPA of 3.00.
Consent: Instructor Consent Required
An introduction to structured research within computer science. Students develop a complete research proposal that poses an important open question in computer science and presents a well-developed strategy for its substantive investigation.
Attributes: Capstone Course
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 485 Software Engineering II (3 crs)
Prerequisite: CS 355
An application of software engineering principles to a software project developed throughout the semester. Students will work in groups to describe, design, implement, test, and deliver a software product for a client.
Attributes: LE-S3 Creativity, Service-Learning, Full 30 Hours, Capstone Course
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 490 Computer Science Practicum (3 crs)
Prerequisite: CS 485
• Cannot be taken for credit toward fulfilling the major if the student has completed three or more credits in CS 498 (formerly CS 405).
A reflective examination of the principles and practices inherent to the study of computer science, including completion of a comprehensive project.
Attributes: Service-Learning Optional, Capstone Course
Grading Basis: S/U Only Grade Basis
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 491 Special Topics (3 crs)
• See current Class Schedule.
An examination of current topical material of special interest to students and faculty. Topics that have been offered include: Analysis of Algorithms, Cryptography and Data Security, Computer Animation, Fuzzy Logic, Advanced Internet Applications, Data Mining, and Computational Biology.
Repeat: Course may be repeated

CS 492 Research in Computer Science II (3 crs)
Prerequisite: CS 482. Limited to computer science majors and minors.
Consent: Instructor Consent Required
Students carry out a research investigation based on a structured research proposal. The investigation includes a detailed analysis of existing literature in the area of investigation and the preparation of a research dissemination article.
Attributes: Capstone Course
Lecture/Discussion Hours: 3
Lab/Studio Hours: 0

CS 493 Collaborative Research (1-3 crs)
Prerequisite: CS 355
An in-depth investigation into open issues within computer science and/or its application to other disciplines.

CS 498 Computer Science Internship (1-6 crs)
Consent: Department Consent Required
• A maximum of three credits can be counted as a CS elective.
Practical work experience that extends knowledge gained in prior courses.
Attributes: Service-Learning Optional, Capstone Course, Internship
Repeat: Course may be repeated for a maximum of 6 credits

CS 499 Independent Study - Seniors (1-3 crs)
Prerequisite: Minimum senior standing.
Consent: Department Consent Required
Individual project under the direction of a faculty member.
Repeat: Course may be repeated

CS 793 Special Topics in Computer Science (1-3 crs)
Consent: Department Consent Required
Permits groups of graduate students to study topics in the field of computer science.
Repeat: Course may be repeated
Grading Basis: No S/U Grade Option

CS 797 Independent Study (1-3 crs)
Consent: Department Consent Required
Individual project under the direction of a faculty member.
Repeat: Course may be repeated
Grading Basis: No S/U Grade Option
