INTERDISCIPLINARY PROGRAMS

Interdisciplinary Curricula
A number of interdisciplinary academic programs, majors, minors and certificates, i.e., those that cross disciplines, are housed in the College of Arts and Sciences or affiliated with the College. All represent collaborative efforts to provide course work across and study of interconnections between multiple fields. The curriculum is delivered in a variety of ways. Often, faculty contribute disciplinary courses to interdisciplinary major, minor or certificate requirements and electives. Disciplinary courses may be cross-listed with an interdisciplinary prefix to highlight the contributions of the various fields. In other instances, faculty teach interdisciplinary courses exclusively or partially for the interdisciplinary program. Those with partial assignments in the interdisciplinary program also teach disciplinary courses for a “home” department. Interdisciplinary academic programs in the College of Arts and Sciences are listed alphabetically with Arts and Sciences departments.

Inquiries about the interdisciplinary majors, minors, and certificates included in this section may be directed to the identified advisor(s) or academic department/program, or the College of Arts and Sciences. Information regarding the following interdisciplinary comprehensive majors can be found in the noted departmental sections: Actuarial Science—Department of Mathematics; Chemistry with Business—Department of Chemistry and Biochemistry; Geospatial Analysis and Technology—Department of Geography and Anthropology.
